

Fire risk assessment training

This course is designed as an introduction to fire safety risk assessments and covers all the necessary topics to enable the participant to carry out a successful fire safety risk assessment. More and more businesses are placing fire safety responsibility with managers and senior staff who have no background or formal training in fire safety expecting them to complete fire safety risk assessments. A risk assessment can be a challenging task even for a seasoned professional there is a lot of underpinning knowledge required to ensure all aspects of a risk assessment are identified.

This course was designed to partner the fire safety manager's training to give the participant an excellent grounding in both management and practical risk assessments. It covers all aspects of a risk assessment and helps to participant gain a good understanding of what is required to complete a successful risk assessment.

This course is also suitable for anyone who needs a better understanding of fire safety risk assessments.

Instructor qualifications

All our instructors are fully qualified fire fighters with many years of experience. Our unique partnership with Southampton Airport Fire & Rescue Service makes us the only training provider in the south offering training delivered by actual serving fire fighters. This gives us the added advantage of ensuring all the information given is up to date and accurate due to the stringent controls the airport puts on the training of all its firefighters.

Their continual career development programs ensure the training delivered is of the highest standards and all the training staff are fully qualified to NVQ L10/11.

Training facility

Our fully equipped specialist training facility enhances the level of your training above the competition; being one of only a few training providers in the country allowed to recreate live fire situations using real fuels producing real heat and real smoke adding to the experience and realism of your training course.
